HOUSE NUMBERS IMPORTANT

In trying to find new and better ways to serve the community, we at the Humboldt Police Department have come across a potentially hazardous situation. While patrolling in the community, we have noticed that there are many residents within the city limits that have no address numbers affixed to the front of the house. While this may not seem to be a big problem, when it comes to finding an address in a stressful situation, especially at night, our officers need to know exactly where they are going. We at the department know general locations and can usually find the address, however, for your safety and a more rapid response that you deserve, we are asking for the following:

1. All residences and businesses within the corporate city limits of Humboldt have numbers affixed to the front of the house/building.

2. The number needs to be of a size that can easily be seen from the street. (This is usually the two to three inch size.)

3. The numbers need to be displayed in a conspicuous location as to be the most visible possible.

Again we would like to ask for your assistance in this so we can be a more efficient department for you, the citizens. Our service is to you, the citizens of Humboldt. This is simply one way that you can assist us in serving you better.
